

Healthcare

To fulfill healthcare needs of community there is a hospital with a maternity ward. Facilities exist for ophthalmic and dental treatment, ultrasound, ECG, and pathological testing. All consultation and treatment are free for everyone. There are also homeopathic and ayurvedic dispensaries. Dayalbagh has created a health care system with the combination of allopathic, homeopathic, ayurvedic system of medicine. Community is involved in different activities to serve nearby location and village by conducting various medical camp, village visits to spread awareness and providing affordable medical care. Community hospital saran ashram also provides healthcare facilities to student studying in educational institute of community and residing in hostels. Gymnasium, yoga and PT facility is provided to make them physically fit. Community also runs regular acupressure treatment which is very useful for old age people and also for others suffering from pains and other problems.
